# PATENTS

“Our mission with R744.com is getting CO2 Technology faster to market. One of the missing links has been the lack of knowledge regarding CO2 patents. With this new service we will allow interested companies to share their CO2 patents more effectively with experts worldwide.”

Marc Chasserot, Managing Director, Shecco.

After using the search fields or selecting one of the patents from the listing below, the individual fact sheet will provide you with the following information:

- **Official Title:** The patent title as registered with the patents authorities in different markets (English language version, if available).
- **i-Paper:** The patent can be viewed directly online, providing detailed information about the publication and expiration date, the inventors, and the invention covered, including relevant technical drawings. This service is available to all registered R744.com members.
- **Published as:** As a default, this is in most cases the WO version – a patent filed and granted on a worldwide scale. If not applicable, an individual country will be selected as default. Other published versions are available for online viewing and download, as well.
- **Abstract:** A short summary of the invention’s objective, background, and main advantages.
- **Inventors:** A listing of all individuals registered as the inventors for the selected patent.
- **Agent:** The organisation licensing or selling the patent. A “Contact Agent” button opens a request form for all registered R744.com members to get in touch with the patent agent.
